SE LAB - 1

Name: Shriram Chandrasekar

SRN: PES2UG24CS495

Section: H

Requirements Table

Problem Statement: Book Club Reading Challenge & Discussion Portal

Domain: Media, Events & Community

Actors: Club Member, Discussion Lead

Functional Requirements

Req ID	Type	Description	Priority	Acceptance Criteria	Rationale
FR-001	Functional	The system shall allow authenticated Club Members to view available reading challenges and join a selected challenge.	High	**Pass:** The member is successfully enrolled and the challenge appears under active challenges. **Fail:** Enrollment is not recorded or duplicate enrollment occurs.	Joining challenges is the primary mechanism through which members participate in club activities.
FR-002	Functional	The system shall allow Club Members to record and update their reading progress for books associated with an active challenge.	High	**Pass:** Updated progress is stored and displayed correctly. **Fail:** Progress is lost, incorrectly calculated, or modified for another member.	Progress tracking allows members and the club to monitor participation.
FR-003	Functional	The system shall allow Club Members to view discussion topics and post comments or reviews related to books in an active challenge.	High	**Pass:** The comment or review is displayed under the selected discussion. **Fail:** The submission is not stored or appears under the wrong discussion.	Structured discussions are a core purpose of the portal and encourage member engagement.
FR-004	Functional	The system shall allow Discussion Leads to create, modify, and close reading challenges with details such as book, duration, reading target, and description.	High	**Pass:** The challenge is created or modified with the specified details and becomes available to members. **Fail:** Invalid or incomplete challenge information is accepted.	Discussion Leads need control over the reading activities organized by the club.
FR-005	Functional	The system shall allow Discussion Leads to moderate discussion content by removing inappropriate comments or reviews.	Medium	**Pass:** Selected inappropriate content is removed from the discussion. **Fail:** Unauthorized members can remove content or valid content is removed unintentionally.	Moderation helps maintain a constructive and organized discussion environment.

Non-Functional Requirements

Req ID	Type	Description	Priority	Acceptance Criteria	Rationale
NFR-001	Performance & Availability	The system shall respond to normal challenge browsing, reading-progress updates, and discussion requests within 2 seconds for at least 95% of requests under expected concurrent usage.	High	**Pass:** At least 95% of tested requests complete within 2 seconds under expected load. **Fail:** More than 5% of requests exceed the specified response time.	Fast responses provide a smooth experience when members browse challenges and participate in discussions.
NFR-002	Security & Access Control	The system shall enforce role-based access control so that Club Members can modify only their own reading data and Discussion Leads can perform challenge-management and moderation operations.	High	**Pass:** Unauthorized operations are rejected and members cannot access restricted functionality. **Fail:** A user can perform an operation outside their assigned role.	Reading data and moderation capabilities should only be accessible to authorized users.

Use-Case Flow Specification

Problem Statement: Book Club Reading Challenge & Discussion Portal

Use case ID: UC-02

Use case name: Join Reading Challenge

Primary Actor: Club Member

Goal: Allow a Club Member to enroll in an available book-reading challenge.

Preconditions

- The Club Member has an active account.
- The Club Member is authenticated in the system.
- At least one reading challenge is available for enrollment.
- The selected reading challenge has not been closed.

Postconditions

Success

- The Club Member is enrolled in the selected reading challenge.
- The challenge appears in the member’s active challenges.
- The system records the member’s enrollment (member ID, challenge ID, timestamp).

Failure

- No enrollment is created.
- The member’s existing challenge participation remains unchanged.

Main Success Scenario

1. Club Member logs into the Book Club Reading Challenge & Discussion Portal.
2. System includes UC-07 (Authenticate User) to verify the member's credentials.
3. Club Member selects View Reading Challenges.
4. System displays the currently available reading challenges.
5. Club Member selects a desired reading challenge.
6. System displays the challenge details, including the book, reading target, duration, and description.
7. Club Member selects Join Challenge.
8. System verifies that the challenge is open and that the member is not already enrolled.
9. System records the member's enrollment and adds the challenge to the member's active challenges.
10. System displays a confirmation message.
11. Use case ends successfully.

Alternate Flow

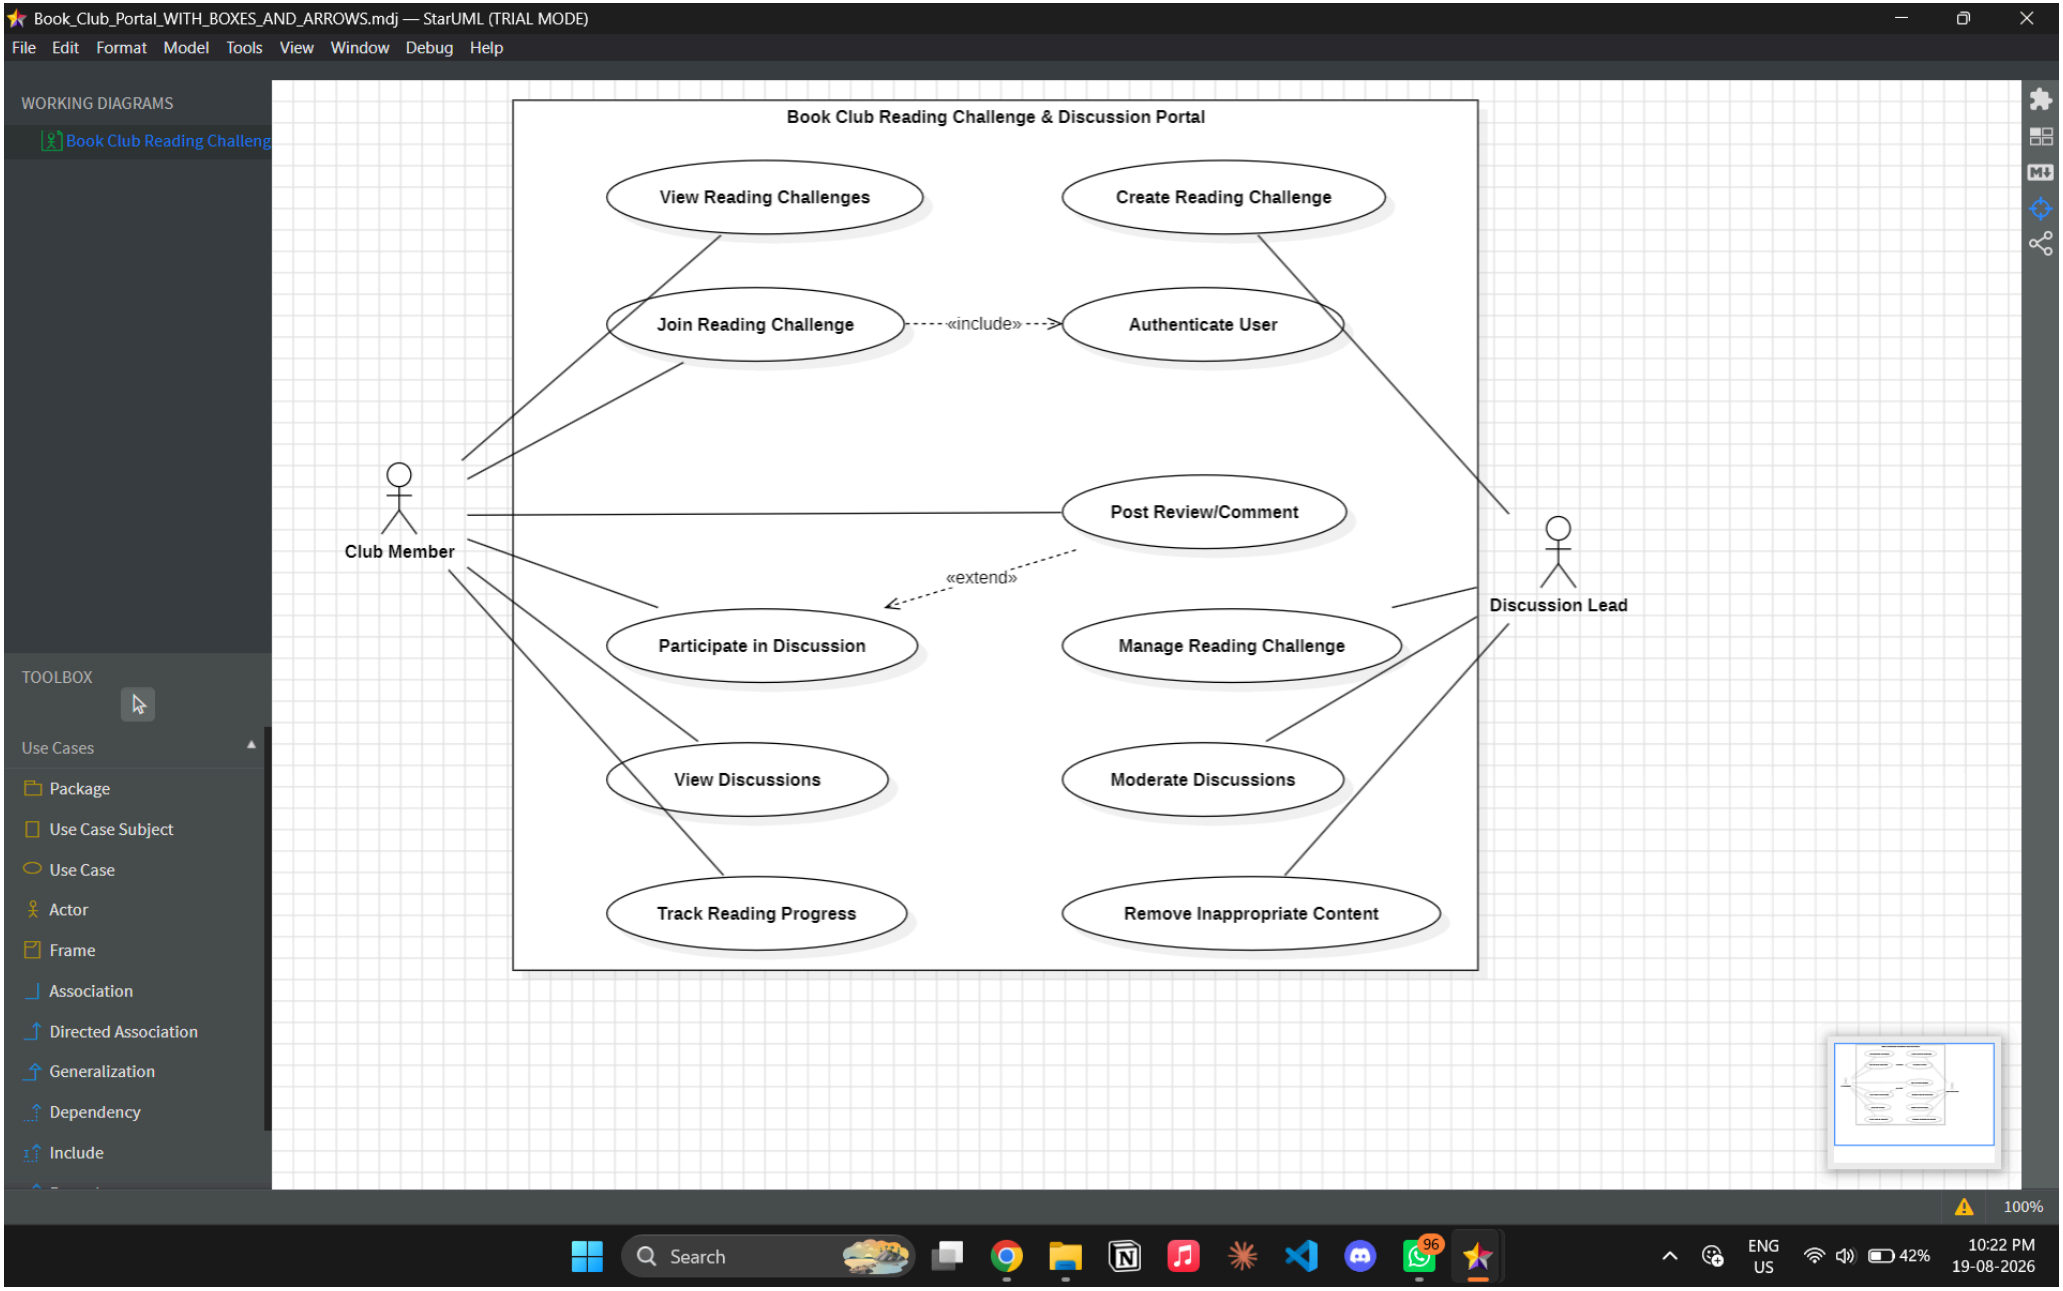

8a. Challenge No Longer Available

8a1. System determines that the selected challenge has been closed or is no longer accepting members.

8a2. System does not create an enrollment.

8a3. System displays a message informing the Club Member that the challenge is unavailable.

8a4. System returns the Club Member to the list of available reading challenges; the use case ends without an enrollment
